Muhammad Usman

Oracle APEX Developer

Pakistan | muhammadusman.tech8@gmail.com | github.com/musmantech8 | linkedin.com/in/muhmmad-usman-364108401

PROFILE

I build practical, data-driven web applications with Oracle APEX, SQL and PL/SQL, turning everyday business workflows into clean and reliable tools. I enjoy turning real-world needs into organised, easy-to-use applications, with a focus on clean data models and clear workflows.

EDUCATION

Bachelor of Science in Information Technology
Virtual University of Pakistan | In progress

Self-directed: Oracle APEX, SQL & PL/SQL
Hands-on practice through real application builds | Ongoing

SKILLS

Oracle APEX (pages, forms, interactive reports, dashboards) | SQL (joins, aggregations, reporting queries) | Oracle PL/SQL (procedures, functions, triggers, business logic) | HTML & CSS | JavaScript

SELECTED PROJECTS

Employee Management System (HR web application)
Oracle SQL, PL/SQL, JavaScript | github.com/musmantech8/employee-management-system
Employee records, departments and salaries with a dashboard, search, filters and CSV export. Oracle schema with triggers, a salary audit trail and a PL/SQL package for raises, transfers and terminations.

Project Tracking Dashboard (Dashboard)
Oracle SQL, PL/SQL, Charts | github.com/musmantech8/project-tracking-dashboard
Projects, owners, tasks and deadlines with KPI cards, status charts and overdue alerts. A PL/SQL package keeps each project status in sync with its tasks.

Inventory & Stock Manager (Business application)
Oracle SQL, PL/SQL, Database Design | github.com/musmantech8/inventory-stock-manager
Products, stock in/out and low-stock alerts. A database trigger keeps quantities correct and blocks negative stock; reports include stock value and a running balance.
