PROFILE

Oracle APEX developer who builds practical, data-driven web applications with SQL and PL/SQL, and builds the front-end interfaces that sit on top of them in HTML, CSS, JavaScript and React. I focus on clean data models, clear business workflows and interfaces that make everyday work simpler. Currently completing a BS in Information Technology at Virtual University of Pakistan.

TECHNICAL SKILLS

Database & back end	Oracle Database, SQL (joins, aggregations, reporting queries), PL/SQL (procedures, functions, triggers, packages), database design
Low-code & web	Oracle APEX: pages, forms, interactive reports, dashboards, dynamic actions
Front end	React, JavaScript, HTML5, CSS3, Tailwind CSS, Framer Motion, responsive design, reduced-motion and focus-state accessibility
Tools	Git, GitHub, Vite, Vercel, Visual Studio Code

HOW I WORK

01 Understand	Learn the real workflow and the data behind it first.
02 Model	Design tables and relationships that keep data reliable.
03 Build	Create pages, reports and PL/SQL logic around user tasks.
04 Refine	Test, polish and improve based on feedback.

FEATURED PROJECTS

Personal Portfolio Website

Front-end project · React single-page site
React 18 · Vite · Tailwind CSS · Framer Motion · Lenis smooth scrolling

- Responsive, animated single-page portfolio with dark and light themes saved per visitor and an animated navigation with an active-section indicator.
- Scroll-linked process timeline, bento-style skills grid with cursor spotlight, and project showcases with HTML/CSS mock interfaces and syntax-highlighted PL/SQL snippets.
- Performance and accessibility work: transform and opacity animations only, a single Lenis scroll loop, and full support for reduced-motion preferences; deployed on Vercel.

Employee Management System

HR web application · Oracle APEX / PL/SQL back end with HTML, CSS and JavaScript front end
Oracle SQL · PL/SQL · JavaScript

- Employee records, departments and salaries with a dashboard, search, filters and CSV export.
- Oracle schema with triggers and a salary audit trail, plus a PL/SQL package for raises, transfers and terminations.

Source: github.com/musmantech8/employee-management-system

Project Tracking Dashboard

Dashboard · HTML, CSS and JavaScript front end with a PL/SQL back end
Oracle SQL · PL/SQL · Charts

- Projects, owners, tasks and deadlines with KPI cards, status charts and overdue alerts.
- A PL/SQL package keeps each project status in sync with its tasks.

Inventory & Stock Manager

Business application · HTML, CSS and JavaScript front end with a PL/SQL back end
Oracle SQL · PL/SQL · Database design

- Products, stock in and out, and low-stock alerts.
- A database trigger keeps quantities correct and blocks negative stock; reports include stock value and a running balance.

Library Management System

Business application · Oracle APEX with PL/SQL business rules
Oracle APEX · PL/SQL · Oracle SQL · Role-based access

- Books, members and loans with a dashboard, self-service sign-up and admin-only management of the catalogue, members and loans.
- Business rules enforced in the database: loan limit of five books, borrowing blocked when no copies are left or a member is suspended, and automatic fines.

Helpdesk Ticket Tracker

IT support · Oracle APEX with a controlled ticket workflow
Oracle APEX · PL/SQL · Oracle SQL · Role-based access

- Raise, assign and resolve IT tickets with SLA due dates by priority, a strict status flow and a full status history.
- Dashboard of open, overdue and unassigned work; users see only their own tickets, administrators see everything.
